Re: **Specialty medications added to our prior authorization list**

You are receiving this notice because our records show that you have received an injectable medication during an office visit. Effective January 1, 2019, the medication will require prior authorization.

We understand that specialty medications are vital for people who have rare, complex or hard to treat conditions. These medications improve the health and lives of individuals by helping them reach better health outcomes.

Since they are generally expensive, we are including several specialty injectables to our prior authorization list as an enhanced Specialty Pharmacy Program for our employees.

To see if you are affected, please review the attached list of specialty injectables.

If you find your medication on the list, you or your doctor will need to call UMR for a prior authorization. Please have your doctor call 1-877-233-1800 to initiate prior authorization, which is also located on the back of your ID card.

If you have any questions, contact the customer service phone number at 1-888-438-6105.
